Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent 5-132173.

The '173 patent teaches a sheet feeder comprising a sheet receptacle, 21, and feeding device, 101, rotatably disposed at the flank of a main apparatus for holding and feeding sheets, see figure 4. The feeding device includes an urging mechanism for pressing the feeding means by transmission of a drive force, the feeding device is rotatably shifted between an operating and retracted position. The urging mechanism has a predetermined range of play. The urging mechanism includes a projected portion, 14, and a hollowed portion, 13, that defines the range of play, , see figures 3 and 4 and paragraphs 0026-0028. The feeding device is located within an image forming apparatus.

Response to Arguments

Applicant's arguments filed 7 December 2005 have been fully considered but they are not persuasive.

Applicant argues that the JP '173 reference does not teach that the feeding device is located at the flank of the apparatus. Figure 4 shows a perspective drawing of the image forming

Art Unit: 3653

apparatus, the figure depicts the apparatus front the front side. It is clearly shown in Figure 4 that the sheet feeding device is located on the right side, or right flank, of the apparatus. Figure 4 shows that the feeding device 101, and sheet receptacle, 21, are rotated into the storage position. Paragraph 0003 indicates that the feeding receptacle is attached to the body of the apparatus and figures 2 and 3 show that the feeding device feeds sheets from a receptacle on the right hand side of the feeding device. This indicates, that despite the lack of reference number, figure 4 shows a stored sheet receptacle on the right hand side of the figure.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
